

Rainwater Harvesting Initiative – 2017-18

In 2017-18, under the guidance of Dr. Kalpana Bhakuni (Officiating Principal from 2017), we got in touch with a not-for-profit organisation called Forum for Organised Resource Conservation and Enhancement (FORCE) to make the existing system work more efficiently. They helped us calculate the existing rainwater harvesting capacity and the possibilities of expansion to other buildings. A two membered team from the organisation also cleaned up the system and made it functional and prepared for the coming monsoon. We also plan to expand rainwater harvesting system to other constructed areas in near future.
